Forward Looking Statements

FORWARD LOOKING STATEMENTS

Except for the statements of historical fact, the information contained herein is of a forward-looking nature such forward looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievement of the company to be materially different from any future results, performance or achievements expressed or implied by statements containing forward looking information such factors include metal prices, exploration success, continued availability of capital and financing and general economic, market or business conditions.

Although the company has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated or intended there can be no assurance that statements containing forward looking information will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements accordingly, readers should not place undue reliance on statements containing forward looking information readers should review the risk factors set out in the company's filing statement as filed on SEDAR.

CAUTIONARY NOTE TO U.S. INVESTORS CONCERNING ESTIMATES OF INFERRED RESOURCES:

This presentation uses the term "inferred resources". U.S. Investors are advised that while this term is recognized and required by Canadian regulations, the securities and exchange commission does not recognize it. "Inferred resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred resource will ever be upgraded to a higher category. Under Canadian rules, estimates of "inferred resources" may not form the basis of feasibility or other economic studies. U.S. Investors are also cautioned not to assume that all or any part of an "inferred mineral resource" exists or is economically or legally mineable.

The technical disclosure in this presentation has been approved by Thomas Poitras, P. Geo, Chief Geologist of Scorpio Gold Corp. and a Qualified Person as defined by National Instrument 43-101 of the Canadian Securities Administrators.

The Manhattan District

- 1 **POSITIONED FOR GROWTH**
Manhattan is a **district-scale opportunity**¹ with multi-million-ounce potential. Targeting an expanded **50,000+ metre drill program over 12 months**.
- 2 **WELL FINANCED FOR AGGRESSIVE 12 MONTHS**
\$8M+ in cash:
 - \$7.5M USD from the sale of Mineral Ridge Mine
 - Strategic \$8M placement with Ross Beaty and Eric Sprott
 - **In-the-money warrants**
- 3 **UNMATCHED GRADE IN NEVADA – OVER 1 g/t**
Our recently announced initial MRE (**740k oz @ 1.26 g/t**)² highlights the open-pit growth profile, & the high-grade nature of Manhattan—**well above peer averages (<0.6 g/t)**.
- 4 **NEWLY CONSOLIDATED DISTRICT**
Packaged **four geologically contiguous properties** together, located **15 kilometres south of Kinross' Round Mountain Gold Mine** (15M+ oz).

1: The 2-million-ounce target is conceptual in nature and refers to an exploration target only. There has been insufficient exploration to define a mineral resource, and it is uncertain if further exploration will result in the target being delineated as a mineral resource. This statement is based on geological interpretation and does not imply a mineral resource beyond the areas currently as inferred.

2: All 740,000 oz are in the inferred category with a 0.3 g/t gold cut-off grade (source: <https://wp-scorpiongold-2025.s3.ca-central-1.amazonaws.com/media/2025/10/Scorpio-Gold-Manhattan-Mineral-Resource-Estimate-43-101-FINAL-2025-10-23.pdf>).

The Company has no interest in, or rights to, any of the adjacent properties mentioned, including the Round Mountain Gold Mine, and exploration results on adjacent properties are not necessarily indicative of mineralization on the Company's properties. Any references to exploration results on adjacent properties are provided for information only and do not imply any certainty of achieving similar results on the Company's properties.

Share Structure and History

as at June 24, 2026		PRICE	SHARES
Basic Outstanding			302,964,194
Options Outstanding		\$0.135-\$0.405	26,487,081
Restricted Share Units Outstanding			7,930,000
Warrants Outstanding		\$0.25	1,950,000
Broker Warrants Outstanding		\$0.25	10,000
Fully Diluted			339,341,275

Goals & Milestones

RECENT NEWS

Scorpio Gold Drills 2.56 G/T Gold Over 13.38 Metres From 293.28 Metres Within Manhattan Caldera, at Black Mammoth

Scorpio Gold Drills 6.95 G/T Gold Over 11.98 Metres From 242.99 Metres Within Caldera Volcanics

Scorpio Gold Drills 1.27 G/T Gold Over 45.23 Metres From 137.95 Metres Along Caldera Margin at Goldwedge

Scorpio Gold Drills 0.58 G/T Gold Over 18.04 Metres From 311.05 Metres Within Manhattan Caldera, at Black Mammoth

Scorpio Gold Drills 2.77 G/T Gold Over 12.68 Metres From 58.64 Metres Along the Zanzibar Trend, at Manhattan, Nevada.

Scorpio Gold Announces Receipt of Second Deferred Payment from Mineral Ridge Sale

In a League of its Own?

2025 MAIDEN MINERAL RESOURCE ESTIMATE

740,000 ounces Au at 1.26 g/t Au¹.

GOLD RECOVERY

Historical open-pit production returned ~70% Au. Additional historical testing suggests 90+% Au is possible.

GOLD GRADE

A +1 g/t Au Resource in Nevada **beats the average grade of 0.6 g/t** within the State for the maiden resource.

EXPANSION POTENTIAL

Goal of drilling 50,000+ metres to achieve resource of 2M+ oz in the next 12 months.

¹: The 2-million-ounce target is conceptual in nature and refers to an exploration target only. There has been insufficient exploration to define a mineral resource, and it is uncertain if further exploration will result in the target being delineated as a mineral resource. This statement is based on geological interpretation and does not imply a mineral resource beyond the areas currently as inferred. All 740,000 oz are in the inferred category with a 0.3 g/t gold cut-off grade (source: <https://wp-scorpiogold-2025.s3.ca-central-1.amazonaws.com/media/2025/10/Scorpio-Gold-Manhattan-Mineral-Resource-Estimate-43-101-FINAL-2025-10-23.pdf>).

Manhattan – MRE Next Steps

SCORPIO'S 12-MONTH PLAN:

- 1 Advance drilling at **Goldwedge** and **Manhattan open pit areas** to define additional inferred resources.
- 2 Advance exploration to **test historical estimates** at **Black Mammoth**, **April Fool**, **Hooligan**, **Keystone**, and **Jumbo**.
- 3 Continuously drill targets near **Goldwedge** and the **Manhattan open pits** to get to an inferred resource of **2M oz Au @ +1 g/t¹**.

NOTE ON HISTORICAL ESTIMATES: A Qualified Person has not done sufficient work to make the Historical MRE current, and the Company is not treating the Historical MRE as current. The Company considers the Historical MRE relevant as it demonstrates the presence of significant gold mineralization across multiple zones within Manhattan; however, its reliability is uncertain because it was prepared prior to the adoption of the current CIM Definition Standards and current QA/QC practices. The Historical MRE provides limited disclosure of assumptions, parameters, estimation methods, cutoff grades, and QA/QC protocols, and therefore these cannot be fully verified by the Company. The categories used in the historical estimate predate, and are not directly comparable to, current CIM Definition Standards, and the Company is not treating the Historical MRE as a current Mineral Resource Estimate. To upgrade and verify the Historical MRE in order to make it a current Mineral Resource Estimate, the Company would be required to undertake confirmatory drilling, modern QA/QC sampling, validation and digitization of historical datasets and updated geological modeling followed by the preparation of a new Mineral Resource Estimate in accordance with CIM Definition Standards and NI 43-101. The Company encourages readers to exercise appropriate caution when evaluating the Historical MRE. All scientific and technical information relating to Manhattan pertaining to the Historical MRE contained in this news release is derived from the Technical Report dated May 1997 titled "Exploration and Pre-Production Mine Development, Manhattan District Project, Nye County" (the "Historical Technical Report") prepared by New Concept Mining, Inc. The information contained herein in respect of the Historical MRE is subject to all the assumptions, qualifications and procedures set out in the Historical Technical Report and reference should be made to the full text of the Historical Technical Report.

1: The 2-million-ounce target is conceptual in nature and refers to an exploration target only. There has been insufficient exploration to define a mineral resource, and it is uncertain if further exploration will result in the target being delineated as a mineral resource. This statement is based on geological interpretation and does not imply a mineral resource beyond the areas currently as inferred.

A Long History of Mining in Manhattan

The Manhattan Mining Boom: 1890 - Present

-  **1890:** The first patented claim is mined in the Manhattan area (within Scorpio's "Big Apple" claims).
-  **1905:** The Manhattan District Gold Rush began, and the first gold mine was started on Scorpio Gold's ground.
-  **1920-1950's:** Hundreds of adits were dug during the Gold Rush. **Nevada's largest ever dredge** worked downstream of Scorpio's Goldwedge and Manhattan mines.
-  **1970's:** The first ever effort to amalgamate the district was conducted by **Howard Hughes's Summa Corp**, which began production of the Manhattan Pits.

The Manhattan District Geology

Situated within the Shoshone Mountain range in Nevada, the Manhattan District is within the same caldera range as Kinross's Round Mountain (+15M oz) mine.

Manhattan is hosted within the same Paleozoic basement rocks found at Round Mountain.

The Manhattan District has been affected by the Antler, Sonoma, and Nevadan orogenies, Tertiary volcanic activity, and Basin & Range formation.

Mineralization at Manhattan is interpreted as a low-sulfidation, epithermal, gold-rich system.

Note: The Company has no interest in, or rights to, any of the adjacent properties mentioned, including the Round Mountain Gold Mine, and exploration results on adjacent properties are not necessarily indicative of mineralization on the Company's properties. Any references to exploration results on adjacent properties are provided for information only and do not imply any certainty of achieving similar results on the Company's properties.

Drilling Highlights - Top 20

Drill Hole ID	Gold (g/t)	Intercept (m)	From (m)	Gold (g-m)
MWRC22-003	27.16 g/t	over 16.8 m	from 59.5 m	456
25MN-042	5.22 g/t	over 36.82 m	from 127.01 m	192
MWRC22-010	11.98 g/t	over 13.7 m	from 134.2 m	164
MWRC22-021	3.98 g/t	over 41.2 m	from 24.4 m	164
25MN-044	3.14 g/t	over 49.62 m	from 59.95 m	156
25MN-011	1.24 g/t	over 92.81 m	from 59.13 m	115
MWRC22-018	4.9 g/t	over 22.9 m	from 62.5 m	112
GWUG20-001	12.47 g/t	over 7.6 m	from 25.3 m	95
24MN-009	1.69 g/t	over 55.7 m	from 118.95 m	94
24MN-007	63.7 g/t	over 1 m	from 221.3 m	64
25MN-043	9.03 g/t	over 7.01 m	from 268.53 m	63
24MN-007	6.08 g/t	over 9.4 m	from 167.9 m	57
MWRC22-018	5.19 g/t	over 9.2 m	from 112.9 m	48
26MN-063	2.09 g/t	over 22.25 m	from 34.14 m	47
25MN-026	1.85 g/t	over 24.67 m	from 98.76 m	46
26MN-057	1.02 g/t	over 40.23 m	from 195.68 m	41
25MN-015	5.49 g/t	over 7.32 m	from 124.36 m	40
25MN-011	1.5 g/t	over 25.15 m	from 303.73 m	38
25MN-045	0.65 g/t	over 57.64 m	from 29.59 m	37
MWRC22-018	1.22 g/t	over 30.5 m	from 212 m	37

Manhattan District Targets

Note: Photo Location and direction of view are noted on the map to the right in yellow.

All the core Manhattan targets are past producing and can be connected with drilling.

Manhattan District Targets

ADVANCED

Currently Drilling; Mineralization is still open along strike and at depth. Drilling may have defined a historical resource, or the target is a past producing mine. There is a strong understanding of geology, with a geological model prepared.

DRILL-READY

Drill Target; mineralization displays continuity with unconstrained dimensions. Historic data compilations may require confirmation work. Targets may be deep extensions of existing mineralization, or have had preliminary or scout drilling completed, and are prospective.

IDENTIFIED

Mineral Occurrence; geological surveys (soils, grabs, geophysics, etc.) indicate potential mineralization with unconfirmed continuity.

TARGET DEFINITION

Potential Mineral Occurrence; may have geological surveys, historical workings and data.

As historic data is compiled and reviewed, and new data is collected and modelled, each target will continue to upgrade towards the advanced target stage on the Target Triangle.

Targets & MRE Mineralization

Manhattan-Goldwedge Inferred Resources

Looking Northeast, Section Thickness = 30m
Block Filter: Inferred / >0.3 g/t Au / In-Pit

Metallurgy

Non-refractory, free gold.

Four distinct historical production profiles with slightly different flow sheets, from 1978-2012.

Gold is non-refractory (free).

Historical **heap leach** recovery of **77%** (1989-1990 production data from Echo Bay).

Previous **flotation with gravity** testing recoveries **greater than 90%**.

2025 Metallurgy Program to confirm mineralization is amenable to cyanidation (as expected).

Metallurgy Program is **designed to develop a preliminary flow-sheet**.

Note: Polished thin section taken from 1988 Manhattan concentrate, showing free gold alongside pyrite fragments. Photo captured at X350 magnification.

Our Team

MANAGEMENT & ADVISORS

Zayn Kalyan
CEO & Director

An experienced investment banker and business development executive. Partner of Altus Capital Partners, he has played an instrumental role in the origination of over \$50 million in financings.

Andrea Yuan
CFO

Over 20+ years in the industry, Andrea has significant experience in public company mergers & acquisitions, reverse take-overs, initial public offerings and CPC qualifying transactions. She specializes in providing accounting, financial and management consulting to venture companies listed on TSX-V, CSE, OTCBB and ASX.

Harrison Pokrandt
VP Exploration

Nine years in mineral exploration and has developed extensive geologic knowledge working on various styles of gold deposits on 4 continents. Primarily with major producer B2Gold, he has been involved in projects and mines at all stages of development.

Jeff Lindstrom
VP Operations

30+ years experience in the mining industry, beginning as a mine engineer with Pegasus Gold Corporation. Projects include engineering activities for a high-grade gold-silver exploration in Mexico and supporting various DKA project due diligence.

Thomas Poitras
Chief Geologist

Over 15 years' experience throughout the petroleum, mining, and consulting geology industries. Trusted with managing and progressing projects, with budgets up to \$35M, at all stages throughout the mine life cycle.

Leo Hathaway
Executive Technical Director

30+ years experience in the mineral exploration industry and is currently Executive Chairman of Golden Shield Resources Inc. and Senior VP of Lumina Gold Corp. Played a pivotal role in the acquisition, advancement and sale of the ten original Lumina Copper projects in the Americas, aggregating \$1.65 billion.

Charles Funk
Advisor

Over 14 years of industry experience for major and junior mining and companies including Newcrest Mining and Evrim Resources. Charles has led or supported multiple deposit discoveries in Mexico and Australia and contributed to over \$60 million dollars in capital raisings.

Daniel Kunz
Technical Advisor

Was Senior VP and COO of Ivanhoe Mines Ltd. (1997-2000). Then, as President, CEO and Director (2000-2003), he was one of the driving forces in taking Ivanhoe Mines into Mongolia and discovering Oyu Tolgoi. During his tenure, the market capitalization value of Ivanhoe Mines increased from \$400 million to \$4.4 billion.
